

“WiN Global” met in Berlin at the Annual Meeting on Nuclear Technology (AMNT) 2017

This year, the traditional WiN Lunch along with the AMNT on May 17th was the absolute highlight compared to all previous gatherings: WiN Germany was very proud to welcome both our WiN Global president Gabi Voigt and Cristina Bucur, the WiN Europe president.

Gabi Voigt – habilitated from the University of Munich/Germany and former head of the Office of Analytical Services in the IAEA Department of Safeguards – was elected as WiN Global President in November 2016 and the WiN Europe President Cristina Bucur from Cernavoda NPP

First of all, Gabi was invited by the AMNT program committee to open the session on **Know-How, New Build and Innovations** on May 17th with a keynote on *Managing Nuclear Knowledge with Competence and Grace* where she emphasized the important role of women and WiN in managing the preservation of nuclear knowledge.

This matter was taken up again in very lively discussions with 25 female participants during the WiN lunch.

By coincident it happened to be an unofficial WiN Global gathering since the women came from 8 countries all over the world.

Gabi highlighted once more: *“Topics like career prospects and job opportunities or the establishment of mentoring programs are very important for me and one of the main focuses of my activities as WiN Global president.”*

Cristina Bucur - arrived from Dusseldorf where she held a keynote about WiN Europe at the

ESARDA Symposium on Safeguards and Nuclear Non-Proliferation - is certain: *“It is all about qualities - women can do all kinds of jobs because they are multitasking. And women are emotional-rational whereas men are more rational-emotional.”*
